

Generalized Anxiety Disorder Treatment Guidelines
Published by the Canadian Psychiatric Association

Considerations

ValueOptions has elected to utilize the treatment guidelines for Generalized Anxiety Disorder published by the Canadian Psychiatric Association. Within these guidelines are recommendations for psychotropic medications to be used in the treatment of this disorder. Some of these medications, while in use in Canada, are either not available within the United States or not approved by the FDA for the usage recommended in Canada.

ValueOptions does not support these non-domestically available or accepted treatment recommendations.
